

Mohamed Rila Ahamed Asri

Aspiring Information Security Engineer

r.ahamedasri@gmail.com · +94 74 010 1153 · linkedin.com/in/ahamedasri · github.com/r-ahamedasri

PROFESSIONAL SUMMARY

Computer Science undergraduate at the University of Westminster (Class of 2028) with a strong, self-directed focus on cybersecurity, cloud computing, and networking. Comfortable with core security principles, network defenses, and application-layer vulnerabilities (OWASP Top 10), with hands-on exposure to Burp Suite and Python for security testing. Analytical and detail-oriented, with a genuine interest in designing secure systems, identifying vulnerabilities, and supporting incident response and vulnerability assessment as part of a security team.

SKILLS

Security & Testing — Information Security Fundamentals, Network Security (firewalls, IDS/IPS, VPNs), Application Security (OWASP Top 10)

Programming — Python, Java, Data Structures and Algorithms

Developer Tools — Git, GitHub

Core Skills — Analytical & Critical Thinking, Attention to Detail, Team Collaboration, Continuous Learning

PROJECTS

Hash Identifier — Python security utility

Built a command-line tool that analyses a given hash string and identifies its likely algorithm (MD5, SHA-1, SHA-256, and others) using pattern and length heuristics, aimed at speeding up early-stage password-cracking and forensic workflows.

Password Manager — Python, Encryption algorithms

Developed a local password manager that encrypts and stores user credentials, with secure master-password authentication and lookup, applying core cryptography and secure-storage principles.

Origin AI — Python, Google ADK, AI Agents

Built an AI agent with Google's Agent Development Kit (ADK) that looks up a product's carbon footprint from a barcode, QR code, or name, combining agentic AI workflows with external data lookup to surface sustainability insights.

EDUCATION

BSc (Hons) Computer Science — University of Westminster (United Kingdom), delivered by Informatics Institute of Technology (IIT), Colombo *Jan 2026 – Expected 2028*

Foundation in Computing — Informatics Institute of Technology (IIT), Colombo *May – Dec 2025*

Information Technology and English — BCAS Campus *Feb – Jun 2025*

GCE Advanced Level (A/L) — Zahira College, Kalmunai *Jan 2023 – Dec 2024*

PROFESSIONAL INVOLVEMENT

IEEE — **Member** · IEEE Computer Society · IEEE Robotics and Automation Society *(Jan 2026 – Present)*

CERTIFICATIONS

Learning Git and GitHub · Python (Foundations) · Developing Self-Awareness
